

Table of Contents

About the Workbook and Exercises	1
Before You Begin	2
Chapter 1: Mapping and Digital Data Fundamentals	3
Mapping Exercise: Create a Flat Map from a Globe	
Mapping Fundamentals	
GIS Fundamentals	
Chapter 2: The Vermont Interactive Map Viewer	13
An Online GIS Application Example	
The GIS Interface	
Mapping Exercise: Locate VCGI Using the Basemap	
Additional Online Mapping Applications	
Chapter 3: Introduction to Quantum, Projects, Data Layers and The Map View	23
Quantum GIS (QGIS - Version 1.7.4 'Wroclaw')	
About Geographic Data Types	
Creating a Quantum Project and Adding Data Layers	
Opening an Existing QGIS Project	
The Zoom and Pan Toolbar	
Understanding Map Units and Scale	
The Measuring Tool	
What is Metadata?	
Chapter 4: Layer Properties	41
Working with Layer Properties – Symbols	
Drawing Features using Graduated Symbols	
Adding Labels	
Understanding Scale Dependency	
Chapter 5: Understanding and Using Attribute Data, Queries and Analysis	60
Viewing Attributes and Selecting Features	
Spatial Queries: Identifying and Selecting Features on the Map	
Selecting Features using Find	
Buffer Analysis	
Selecting Features using Attribute Queries	
Attributes and Metadata	

Chapter 6: Data Acquisition Methods, Procedures, and Issues	77
Data Acquisition	
Downloading Geospatial Data	
Using Data from a Table	
Online Data Resources	
Chapter 7: Creating Map Layouts- Printing and Exporting	88
The Basic Map	
The Layout View – Adding Map Elements	
Notes on Finishing the Map	
Printing and Exporting the Map	
Online Resources: Cartography	
Chapter 8: Introduction to GPS.....	96
What is GPS?	
Using the Garmin 60 GPS Receiver	
Collecting Waypoints and Tracks	
Downloading and Projecting GPS Data	
Using GPS Data With Online Applications and GIS	
Navigating to a Location	
Online Data Resources
